# KRUTHIKA.T

## AUTOMATION ENGINEER

- Offering proficiency in **UI and API test automation**, with an experience of **3+ years**,
- Worked predominantly on **banking/finance** sector for ANZ, delivering quality work.
- Currently looking for a new opportunity to work in an innovative and challenging environment.

## WORK EXPERIENCE

### Associate Consultant / Test Automation Engineer

*Capgemini, Bangalore, Karnataka (2019 - Current)*

#### PROJECT : COBRA

is a Live Customer Onboarding Application at **ANZ**.

- Operated under **Agile and Scrum** framework for ANZ Digital and Transactional banking.
- Performed black box testing, includes functional, automation, exploratory, ad-hoc, end-to-end regression, smoke and sanity testing.
- Designed and documented detailed and efficient test scenarios, test plans/ strategies and automated test scripts, test executions using **Zephyr/X-ray**.
- Developed and maintained end-to-end test frameworks, implemented using **Cucumber** for both **UI and API** (achieved **95%** of test automation).
- Integrated using a CI/CD environment (**Jenkins**), support cross browser tests for Chrome, IE and Edge.
- Collaborated with developers, clients and product owners to analyze and estimate the scope of automation as per requirement
- Facilitated timely showcase of the implemented automation scripts
- Liaised with development team to **diagnose/ track defects**.
- Contributed to environment support (non-prod).
- Engaged in all **phases of Agile** including Daily scrum, PI planning, grooming/refinement sessions, retrospective meetings.

#### PROJECT : BS11 TESTING - COBRA - ANZ

- Trained on AWS, was part of BS11, supported the automation to run on AWS, using guacamole and codefresh.

#### PROJECT : DELEGATED ADMIN

- Assessed in re-engineering test automation process to improve and consolidate end-to-end testing strategy.
